

IDEAS

① Bump chart

Ranking unemployment rate %

② Choropleth map

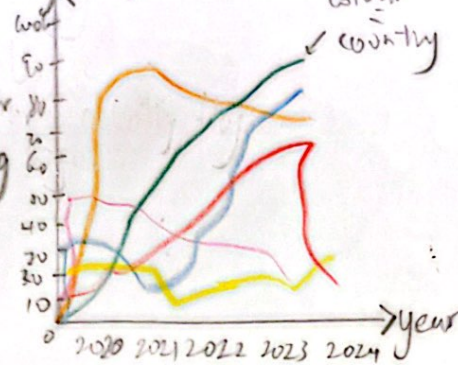

③ Malaysia Cartogram

④ Stacked bar chart

④ Line Chart

⑤ Radial Chart

⑥ Donut Chart

⑦ Flex packed bubble chart

size of segment = unemployment

FILTER

① > ④

③ > ⑥

Both pairs serve the same purpose, remove ④ and ⑥ because ① and ③ more visually appealing

CATEGORIES

I Trends

⑤ Stacked bar

① Bump chart

II Demographic

② Choropleth map

③ Cartogram

QUESTION

→ Highest unemployment rate in Year 2XXX?

→ Male or Female higher unemployment rate?

→ Country 'X' unemployment performance over the years

→ Highest unemployment rate state Malaysia 2023

LAYOUT

UNEMPLOYMENT RATE INSIGHTS

Year: 2024

315
M/F

← global male
to female
unemployment trend

Author: Dominic Jia Yi Lee

Date: 18/10/2024

Sheet 2

Task: Global unemployment trends

OPERATION

→ Choropleth Map

→ Year slider to show distribution of unemployment rates over the years.

→ tooltip showing exact percentage

→ Radial Bar Chart (%)

→ Able to select between male & female unemployment %

→ tooltip with unemployment %

→ Bump Chart

→ Selecting a country (colour), will highlight the line selected

FOCUS

More on global unemployment trends

→ Darker the colour = Higher unemployment rate (%)

→ Size of each segment = unemployment rate (%)

→ Shows top 3 countries unemployment rate trends

→ each colour represents a country

→ ranking of unemployment rate

DISCUSSION

Pros

- Shows time series representation, can show how unemployment has evolved, allowing for analysis
- Top country insights, able to see how long a country remains in top 3, or grows when it is excluded

Cons

→ Lack of regional comparisons, means limited granularity for comparison, not useful for some audiences

LAYOUT

Author: Dominic Jia Yi Lee

Date: 10/10/2024

Sheet 3

Task: Focused unemployment rate

OPERATION

- Malaysia cartogram
- Tooltip showing unemployment rate
- Stacked bar chart
- Year slider to show trend
- each segment represents an age demographic
- Packed bubble chart
- size factor to show zoom rate of bubbles to show differing sizes

FOCUS

All graphs have been changed to cater to focus on Malaysia's demographic

→ Each bubble represents a state in Malaysia

- Tooltip
- unemployment rate %
 - Labour participation rate %
 - Population available to work avg

DISCUSSION

Pros

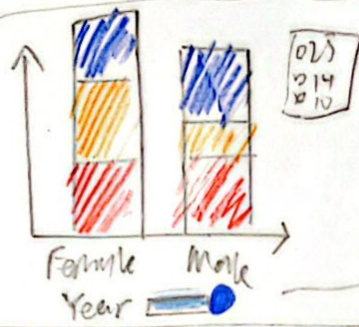

- Focused regional activity allows for a more detailed insight into the country
- Simplified scope

Cons

- No international comparison, limiting insights

UNEMPLOYMENT RATE INSIGHTS

Male

Female

Age v

FOCUS

More on gender relation to unemployment rate

Left side

Right side

allows to see state-level unemployment

gender + time based analysis

Bump Chart and Choropleth = Global

Author: Dominic Sia Yi Lee

Date: 10/10/2024

Sheet 4

Task: Unemployment relation gender

OPERATION

Bump Chart

Now allows for a wider selection of countries to choose to rank

Stacked Bar Chart

Show year trend for both male/female unemployment rate

Radial Bar Chart

Both genders, age demographic dropdown bar

DISCUSSION

Pros

Balanced focus on global and Malaysia unemployment

Able to make better insights via operations

Cons

Visuals may be redundant
Unclear segmentation for audience, could be too broad

UNEMPLOYMENT RATE INSIGHTS

MALE
FEMALE

Importance Threshold: 0.8

Author: Dominic Jia Yi Lee

Date: 10/10/2024

Sheet 5

Task: Unemployment % comparison

OPERATION

→ Radial Bar Chart

→ Male/Female selection

→ tooltip showing unemployment rate

→ segment = country

→ Packed bubble chart

→ Changed to importance threshold, highest unemployment rate $\approx 8\%$, changes colour to red if unemployment rate is above threshold

FOCUS

→ Comparisons

+

+

Radial + choropleth

↳ Global focus

↳ Allows for

analysts

Cartogram + bubble

↳ Malaysia focus

viewer to make compressed via comparing both charts

DISCUSSION

Pros

→ more balanced perspective allows for broader understanding

→ more diverse idioms for visual hierarchy

Cons

→ maybe a bit hard to distinguish, due to

the only way to tell if global/malaysia is title
